## **Lesson Plan**

Name of the faculty: Sh. Vikash Dahiya Lecturer (Mechanical engineering)

**Discipline**: Mechanical

**Semester:** 2nd Mechanical A & B **Subject:** Workshop Technology-I

**Lesson Plan Duration:** 15 weeks (From March 2022 to June 2022) **Work Load (Lecture/ Practical) per week (in hours):** Lecturers- 01,

| Week            |                 | Theory                             | Practical |       |
|-----------------|-----------------|------------------------------------|-----------|-------|
|                 | Lectur          | Topic ( including                  | Practical | Topic |
|                 | e day           | assignment / test)                 | Day       | -     |
| 1 <sup>st</sup> | 1 <sup>st</sup> | Chisels – Types and uses of        | -         |       |
|                 |                 | chisels, wood working chisels,     |           |       |
|                 |                 | metal working chisels – cold       |           |       |
|                 |                 | chisel, hard                       |           |       |
|                 |                 | chisel, stone chisel, masonry      |           |       |
|                 |                 | chisel.                            |           |       |
|                 | 2 <sup>nd</sup> | Hammers – Types, Basic             |           |       |
|                 |                 | design and variations, Physics     |           |       |
|                 |                 | of                                 |           |       |
|                 |                 | hammering, Hammer as force         |           |       |
|                 |                 | multiplier, effect of head's       |           |       |
|                 |                 | mass, effect of handle.            |           |       |
|                 | 3 <sup>rd</sup> | Saw – Saw terminology, types       |           |       |
|                 |                 | of saws, types of saw blades,      |           |       |
|                 |                 | material used for saw,             |           |       |
|                 |                 | Hacksaw frame and                  |           |       |
| 1               |                 | its types.                         |           |       |
| 2 <sup>nd</sup> | 1 <sup>st</sup> | Pliers – Function and types.       |           |       |
|                 |                 | Wrenches/ Spanners –               |           |       |
|                 |                 | Common General                     |           |       |
|                 |                 | wrenches/spanners,                 |           |       |
|                 |                 | Specialized                        |           |       |
|                 |                 | wrenches/spanners, Surface         |           |       |
|                 |                 | plate, V block, files, Surface     |           |       |
|                 | 2 <sup>nd</sup> | Gauge.                             |           |       |
|                 | 2               | Calipers – Types – Inside,         |           |       |
|                 |                 | outside, divider, Odd leg caliper. |           |       |
|                 | 3 <sup>rd</sup> | Vernier Caliper- Parts, uses,      |           |       |
|                 | 3               | checking                           |           |       |
|                 |                 | error, least count, working        |           |       |
|                 |                 | principle.                         |           |       |
| 3 <sup>rd</sup> | 1 <sup>st</sup> | Outside micrometer -               |           |       |
| -               | _               | Introduction, parts, Principle,    |           |       |
|                 |                 | Least count,                       |           |       |
|                 |                 | Checking zero error.               |           |       |
|                 | 2 <sup>nd</sup> | Cutting Tools - Various types      |           |       |

|                 |                 | testing methods.                  |  |
|-----------------|-----------------|-----------------------------------|--|
|                 | 3 <sup>rd</sup> | Principle of turning,             |  |
|                 |                 | Description and function of       |  |
|                 |                 | various parts of a lathe.         |  |
|                 |                 | Classification and                |  |
|                 |                 | specification of various types    |  |
|                 |                 | of lathe, Drives and              |  |
|                 |                 | transmission, Work holding        |  |
|                 |                 | devices.                          |  |
| 7th             | 1 <sup>st</sup> | Lathe tools:                      |  |
| 7111            |                 | Parameters/Nomenclature           |  |
|                 |                 | and applications. Lathe           |  |
|                 |                 | operations - Plain and step       |  |
|                 |                 | turning, facing, parting          |  |
|                 |                 | off, taper turning, eccentric     |  |
|                 |                 | turning, drilling, reaming,       |  |
|                 |                 | boring, threading and knurling,   |  |
|                 |                 | form turning,                     |  |
|                 |                 | spinning.                         |  |
|                 | 2 <sup>nd</sup> | Cutting parameters – Speed,       |  |
|                 |                 | feed and depth of cut for         |  |
|                 |                 | various materials and for         |  |
|                 |                 | various                           |  |
|                 |                 | operations, machining time.       |  |
|                 | 3 <sup>rd</sup> | machining time. Speed ratio,      |  |
|                 | 3               | preferred numbers of speed        |  |
|                 |                 | selection. Lathe accessories:-    |  |
| 8 <sup>th</sup> | 1 <sup>st</sup> | Centers, dogs, different types    |  |
|                 | _               | of chucks, collets, face plate,   |  |
|                 |                 | angle plate, mandrel, steady      |  |
|                 |                 | rest, follower                    |  |
|                 | 2 <sup>nd</sup> | rest, taper turning               |  |
|                 |                 | attachment, tool post grinder,    |  |
|                 |                 | milling attachment, Quick         |  |
|                 |                 | change device for tools.          |  |
|                 | 3 <sup>rd</sup> | Brief description of capstan      |  |
|                 |                 | and turret lathe, comparison      |  |
|                 |                 | of capstan/turret lathe, work     |  |
|                 |                 | holding and tool                  |  |
|                 |                 | guiding devices in capstan and    |  |
|                 |                 | turret lathe.                     |  |
| 9 <sup>th</sup> | 1 <sup>st</sup> | Principle of drilling.            |  |
|                 | •               | Classification of drilling        |  |
|                 |                 | machines and their                |  |
|                 |                 | description. Various operation    |  |
|                 |                 | performed on drilling machine     |  |
|                 | 2 <sup>nd</sup> | – drilling, spot facing, reaming, |  |
|                 | -               | boring, counter boring,           |  |
|                 |                 | counter sinking,                  |  |
|                 | 3 <sup>rd</sup> | hole milling, tapping. Speeds     |  |
|                 |                 | and feeds during drilling,        |  |
|                 |                 | and recas during arithme,         |  |

|                  |                 | impact of these parameters on drilling, |  |
|------------------|-----------------|---|--|
| 10 <sup>th</sup> | 1 <sup>st</sup> | machining time. Types of drills         |  |
|                  |                 | and their features,                     |  |
|                  |                 | nomenclature of a drill.                |  |
|                  |                 |   |  |
|                  | 2 <sup>nd</sup> | Drill holding devices. Types            |  |
|                  | ard             | of reamers.                             |  |
|                  | 3 <sup>rd</sup> | Principle of boring,                    |  |
|                  |                 | Classification of boring machines       |  |
| 11 <sup>th</sup> | 1 <sup>st</sup> | their brief description.                |  |
| 11               | 1               | Specification of                        |  |
|                  |                 | boring machines.                        |  |
|                  | 2 <sup>nd</sup> | Boring tools, boring bars and           |  |
|                  | -               | boring heads.                           |  |
|                  | 3 <sup>rd</sup> | Description ofjig boring                |  |
|                  |                 | machine.                                |  |
| 12 <sup>th</sup> | 1 <sup>st</sup> | Function of cutting fluid,              |  |
|                  |                 | _                                       |  |
|                  | 2 <sup>nd</sup> | Types of cutting fluids,                |  |
|                  | -               | Types or earting naids)                 |  |
|                  | 3 <sup>rd</sup> | Difference between cutting              |  |
|                  |                 | fluid and lubricant,                    |  |
| 13 <sup>th</sup> | 1 <sup>st</sup> | Selection of cutting fluids for         |  |
|                  |                 | different materials and                 |  |
|                  |                 | operations,                             |  |
